BLACKTRACTION

EXPERIENCE AND INNOVATION AT THE SERVICE OF TECHNICAL

Blacktraction: an innovative products line exclusively, born from twenty years of experience in research and technical development in competitions.

These mark a new standard in evolution of improvement, renewal and maintenance of rubber and tire grip, plastics and many derivatives, skin and leather, with the longer duration of effect actually possible.

**BLACKTRACTION, PATENTED PRODUCTS
AT THE SERVICE TO MANY NEEDS RUBBER**

RUBBER

Products dedicated to rubber:

- _Enrich the rubber (tires and gaskets) polymer improving / renewing / maintaining for long time the characteristics of elasticity / adhesion / grip ;
- _Increased adherence of road tires, allow to reduce about 25% the space to stop a car or a motorcycle (increasing control and security road, even on wet asphalt);
- _They are suitable to old and new tires: summer, thermal winter (M + S) and racing;
- _They also shine, improve the appearance, and resist to aggressive cleaner.
- _They counteract aging.

MATERIALS

The lonely plastic renewer without silicone and wax, resistant to aggressive cleaners and solvents, with the most longer duration of effect (8/16 months).

- _it respects the original color and roughness to the touch;
- _does not create thickness;
- _heat-resistant;
- _high degreasing power to silicon, waxes and abrasive paste;
- _finish dry to the touch; water-repellent, protective, paintable.

Also suitable to renew and protect:

- _paints without protection and by chemical reaction;
- _PVC;
- _carbon fiber;
- _gaskets;
- _metal from oxides;
- _the only one to renew, clean and protect white plastic stained from dirt absorbed;
- _to cover and uniform aesthetics black plastic imperfection, irreparably ruined from corrosive or burned with professional dryer.

SKIN/LEATHER

The products to renew and maintain skin and leather with the longer duration of effect (without vaseline / silicone), with finish:

- _dry to touch;
- _water-repellent;
- _heat resistant.

BLACKTRACTION

RENEW_PROTECT_STRENGTHEN

Specific products to many materials.

PLASTIC AND MATERIALS

RS: renew and protect plastic and material, resistant to aggressive cleaners and degreasers. Degreaser power to left silicon, wax and abrasive past, paintable.

RS BLACK: to renew and uniform esthetically black plastic, resistant to aggressive cleaners.

RSB: the only product to renew, clean and protect white plastic stained from absorbed agents or became older. Suitable to protect and remove aggressive dirt and oxides from metals and chrome.

TIRES AND RUBBER

BLACKTRACTION: increase/renew tires adherence/grip and property of rubber, allow to reduce braking space about 20% .

ATT: like Blacktraction, enhanced to: old, winter and road tires used in competition.

GP: just to racing tires (variable to specific features).

RC: to increase sponge tires performances for radio controlled cars.

LG: to beautify and maintain tires and gaskets shiny and elastic, resistant to aggressive cleaners.

LEATHER AND SKIN

LEATHER: to renew, clean and protect the original color of leather and skin, without vaseline (water repellent dry to touch finish long time effect).

BLACK LEATHER: to renew and cover aesthetically imperfections of black leather and skin, without vaseline (water repellent dry to touch finish long time effect).
